You may also upgrade your security package with optional accessories:

R868 transceiver & LCD key fob – add classic 2-way remote control

External microphone – listen a car interior remotely

StarLine R6 – Wireless Bluetooth relay module with engine block, hood lock control, temperature and motion sensors

StarLine MS-06BT – wireless magnetic sensor

In order to get a higher level security and comfort, we recommend you apply to StarLine authorized installer for advice on comprehensive protection for your car.

StarLine S9 v2

SMART SECURITY-TELEMATIC SYSTEM

www.alarmstarline.com

SMART SECURITY AND COMFORT

Advanced car security and telematic system with intelligent remote start, integrated GSM interface, authorization with Bluetooth Smart technology, quick and convenient installation in modern cars with CAN and LIN digital interfaces.

SMART SECURITY

BLUETOOTH SMART AUTHORIZATION

To start driving owner should pass authorization by a small waterproof wireless tag or smartphone with Bluetooth 4.2 version and above

SECURE KEYLESS-GO

Intelligent protection against relay attack with blocking the factory Keyless-Go system when wireless tag or registered smartphone is away

INVISIBLE ENGINE BLOCKING

Unique patented iCAN technology brings another security level by hidden engine blocking through a factory digital CAN or LIN bus

ANTI-HIJACK

StarLine protects against theft and hijacking with safe engine blocking in motion if tag is not detected or with owner's command by GSM interface

SMART 3D SENSOR

Integrated 3D accelerometer registers shocks, motion, jacking-up, towing a vehicle and evaluates driving style

SUPER SLAVE

Control over car security with factory remote and reliable additional authorization with StarLine remote

PIN-TO-DRIVE

Additional authorization provides reliable protection against hijacking, enhancing security functions of factory car alarm. Trip is allowed only after entering an individual PIN-code with car original buttons

RECORD ENERGY EFFICIENCY

StarLine guarantees low energy consumption, saving sufficient car battery charge up to 60 days in arm mode due to patented progressive technologies and firmware solutions

EXTENDED TEMPERATURE RANGE

Due to high quality components StarLine security-telematic systems stably operate in severe climatic conditions at temperature from -40°C to +85°C

COMFORTABLE SERVICE

GSM TELEMATICS

GSM interface allows control over all security and service functions, receive alarm status alerts to mobile phone and StarLine Mobile App

BLUETOOTH SMART CONTROL

Bluetooth Smart provides reliable control over car security and service functions from your smartphone even out of GSM network (available for iOS and Android smartphones with Bluetooth 4.2 and above and StarLine Mobile App)

FREE GPS+GLONASS TRACKING

Connect GPS+GLONASS receiver and monitor your car location with up to few meters accuracy at free and easy website starline.online or StarLine Mobile App

2CAN+4LIN INTERFACE

2CAN+4LIN interface provides easy, convenient and safe installation of StarLine security system to modern cars with CAN and LIN interfaces

REMOTE ENGINE START

Intelligent remote and automatic engine start at a determined temperature, time, weekday or by battery voltage

TURBO TIMER

StarLine extends turbocharged engine life by proper turbine cooling after a trip

SMART IMMO BYPASS

Save money on purchasing an additional bypass module or duplicate key to implement remote engine start on CAN and LIN equipped cars

PARKING HEATER CONTROL

Remote control over Webasto, Eberspächer parking heaters

FLEXIBLE CONFIGURATION

Programmable channels with flexible logic settings for extended vehicle security and comfort functions
