StarLine E9 v2

SMART SECURITY-TELEMATIC SYSTEM

Advanced vehicle security and service upgrade system with classic 2-way remote control, immobiliser and driver authentication, remote start, integrated 2CAN+4LIN data interfaces for quick and easy installation into the modern vehicles

🔒 SMART SECURITY

Dialogue Code

Interactive «friend-or-foe» communicaton protocol with AES128 encryption secures against all existing code grabbers
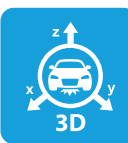

Super Slave

Convenient arming and disarming with OEM keyfob and additional authentication with transponder, two-way keyfob, paired smartphone or PIN code by factory buttons

Smart Immobilizer

Engine start inhibiting or shutdown via CAN or LIN databus and authenticaion with personal ID tag, smartphone or Pin-to-Drive code that can be programmed and entered with standard buttons

Smart 3D Sensor

Embedded 3D accelerometer instantly alerts to any shock, motion, towing or jacking up and can be adjusted to existing environment
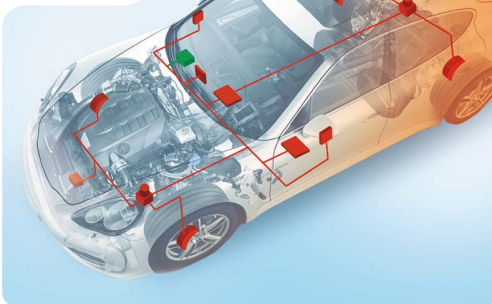

🤖 SMART COMFORT

Remote Start

Comfortable interior climate in winter and summer is provided with intelligent remote and automatic engine start at preset parameters (timer, temperature, battery voltage) and control over parking heaters

Vehicle Data Interfaces

Embedded 2CAN+4LIN digital interfaces bring easy and safe installation into the most modern vehicles with the least possible intrusion in onboard trim and wiring

Hands Free

Automatic unlocking and disarming when owner approaches a vehicle with their wireless ID tag and locking when they leave

Flexible Logic

Unlimited customization benefits with flexible I/O channels and unique programmable operation logic make many of customers' wildest wishes become a reality
