

StarLine E9 car alarm can be operated by factory remote key fob / optional 2-way remote / optional Bluetooth Tag / from **StarLine 2** App on smartphones

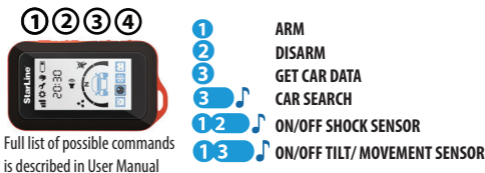

FROM FACTORY KEY

FROM 2-WAY REMOTE

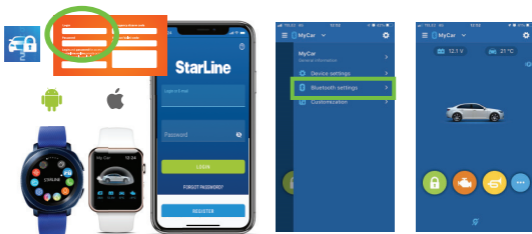

MAIN FUNCTIONS

FROM STARLINE 2 APP*

In order to control **StarLine E9** from smartphone App "StarLine 2" via Bluetooth it should be paired first. Press **Service Button** 7x times and switch Ignition ON. On phone in Bluetooth settings find and pair with StarLine device, use "000000" code if requested. Pair all available BT Tags again. Once paired, switch Ignition OFF. Use LogIn data from the Red Card. Operating from **StarLine 2** App via Bluetooth connection works near the car

* StarLine E9 systems can be controlled and set up also from smartphones via Bluetooth. This option requires advanced knowledge of StarLine technologies. Please ask installer to explain and assist it to use.

* Do not delete device from factory account. It can't be restored back
